

## **HIGH-PERFORMANCE GNSS RECEIVER**

#### 5-Watt Internal Radio: Longer Working Distance

No longer need to carry external radio, for its internal radio's working distance can reach 10 - 15 km.

### Impressive Battery Life: Longer Working Time

Work up to 15 hours and no longer worry about a day's work, with its 13600 mAh battery, which makes your data save safely.

#### 1.45-inch Display: Colorful and Touchable

View the primary status and basic information, set the work mode, and operate the device, facilitating more convenient and direct human-computer interaction.

#### RTK Assistant Technology: Uninterrupted Work Work without interruption even when RTK corrections fail, powered by our RTK assistant technology.

#### Max 60° Tilt Survey: A Different Way of Working

- Quickly measure accurate points while standing or walking without leveling the pole.
- Concentrate on where the pole tip needs to go, which is especially useful during a stakeout.
- Easily start a survey in environments that are hard to reach, such as building corners and slopes.
- No longer worry about the movement of the pole when measuring, provided that the pole tip is stationary.

The eSurvey 800 is a high-performance product by eSurvey GNSS. The durable IP67 design makes it possible to work in various of environments. Multi constellation and frequency tracking always gives a Fixed solution for your job. The colorful touch screen is convenient for quick configurations.
